VARDHMAN

Desiccant Master Batch

(Designed to absorb Moisture)

Anti moisture Granules ♦ Desiccant Master batch
♦ Bhej Dana ♦ Moisture Remover

VARDHMAN Indica Desiccant master batch can counter moisture related problems related to shine, surface finish and strength of polymer products.

It can dramatically absorb moisture from plastic during extrusion process.

We are one of the leading manufacturer of desiccant masterbatches in India.

We manufacturer various grades as per different applications.

OVERVIEW

- User Friendly
- Improve the production efficiency
- Reduce energy consumption
- Increase value of plastics
- Remove moisture
- Increase strength and elongation
- Increase filler loading
- Remove fish eyes
- Remove porosity
- Remove silver streak in molding
- Remove window lenses in film
- Reduce carbon formation

APPLICATION

- Molding
- Blowing molding
- Injection molding
- Lamination
- Raffia Tape Plant
- Tarpaulin
- Reprocess Plastic Granules
- Various Extrusion

Technical Details

- Density :- 1.00 – 1.10
- MFI :- 1-10gm/10 min
- Dosage :- 1 – 3 %

Performance : ♦ High Strength ♦ High Absorption

VARDHMAN

Whatsapp No. 9724287753

Fill-Trans

(Transparent Filler)

Key Features

- Special Quality talc for more transparency
- Sufficient polymer and elastomers loading percentage for better results.

Advantages:

- Higher Loadability upto 50%
- Special grades with ultra-fine Talc, even for very thin film extrusion
- Better strength even with high loading of Fill-Trans in film and Raffia
- Consistency in flow rate
- Improves thermal stability

Applications:

- Woven Sacks / Raffia
- Lamination
- Blown Film / Cast Film
- Blow molding
- Injection molding
- FIBC Bags

ADDITIVE FOR RAFFIA TAPE PLANT
Indica Dry: Indica Dry is a compound of special minerals which can be used for removing moisture and resolving problems related to shine, surface finish, elongation, strength of Tape and Fabric.

Overview :

1. Remove moisture related problem.
2. Increase tensile and impact strength.
3. Increasing flow of material.
4. Increase Shine and Film clarity.
5. Increase production.
6. Increasing Filler loading.
7. Reduce Dusting on the Tape.
8. Cost effective and reduce power cost
9. Reduce wastage
10. Reduce wear & Tear
11. Reduce water carry over
12. Remove Puncture in film
13. Remove fabric shrinkage and curved tapes.
14. Reduce carbon formation in screw barrel

Application :
Tape Plant and
Lamination Plant

Performance :
• High Quality
• High Output
